## Commitment to achieving Net Zero

ORN (Int) Limited is committed to achieving Net Zero emissions by 2035

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: 2019</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
We have measured our Carbon Footprint for five years setting goals annually to reduce all of our scope emissions, which we continually review and actively seek ways to reduce further. We support various People & Environmental projects in the Far East to ensure we are on course to meet our objective of Net Zero by 2035.

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emissions are now the same as our baseline year of 2019. However, this is set against an increase in our business turnover of 35%

The Carbon Reduction plans we have implemented or are working towards include:

- 80% of our vehicles are now all Electric
- 100% of office and warehouse lighting is LED / PIR
- 100% recycling of unusable Cardboard & Plastic
- 50% reduction in waste to landfill
- All plastic is 30%+ recycled composition.
- Certification to ISO14001

In the future we hope to implement further measures such as:

100% of fleet are Electric.  
All deliveries made via electric vehicles  
Air Freight transportation removed  
Solar panels installed.  
Product manufacturing moved to UK  
Zero waste to landfill
